OBJECTIVE

An able, enthusiastic, skilled, and reliable Computer Engineering seeking a position that reflects my experience, skills, and personal attributes including dedication, meeting goals, creativity, and the ability to follow through.

SKILLS

- Programming Languages: C, C++ ,Python
- Development tools: VS Code , Github
- Area of interests: Software Development, AI machine learning , fullstack,Cybersecurity
- Argument reality: Cyber security and Digital Forensics

INTERESTS

- Software Development:
Frontend -
HTML, CSS,JavaScript
- Backend-
SQL ,C++,C,Python,Java
- Problem Solving & Algorithms
- Hackathons & Tech Competitions
- Cybersecurity
- Competitive Programming

LANGUAGE

- English
- Hindi
- Gujarati

EXPERIENCE

EDUCATION

2025 **Parul University**
Diploma Computer Engineering
9.60 cgp

2023 **GK Gurukul**
SSC
69%

PROJECTS

Real Estate Website

Developed a real estate website to facilitate property listings, searches, and inquiries, providing an intuitive user experience for buyers, sellers, and agents.

A Radar System

An IoT-based radar system combines traditional radar technology with IoT devices and connectivity. It allows for remote monitoring, real-time data transmission, and enhanced analytics, enabling applications in surveillance, transportation, weather monitoring, and industrial automation.
